Contents of Volume 87 2000/2001

Adly S, Goeleven D: A discretization theory for a class of semi-coercive unilateral problems 1

Bermejo R: Analysis of a class of quasi-monotone and conservative semi-Lagrangian advection schemes 597
Bermúdez A, Rodríguez R, Santamarina D: A finite element solution of an added mass formulation for coupled fluid-solid vibrations 201
Blasco J → Codina R
Boffi D: Fortin operator and discrete compactness for edge elements 229
Bojanov BD, Petrov PP: Gaussian interval quadrature formula 625
Bourdarias C: Convergence of fluctuation-splitting schemes for two dimensional scalar conservation laws with a kinetic solver 645
Bourgeois C, Nicaise S: Prewavelet analysis of the heat equation 407

Chan RH, Ching WK: Circulant preconditioners for stochastic automata networks 35
Ching WK → Chan RH
Codina R, Blasco J: Analysis of a pressure-stabilized finite element approximation of the stationary Navier-Stokes equations 59

Dontchev AL, Qi H, Qi L: Convergence of Newton's method for convex best interpolation 435

Eisinberg A, Pugliese P, Salerno N: Vandermonde matrices on integer nodes: the rectangular case 663

Furihata D: A stable and conservative finite difference scheme for the Cahn-Hilliard equation 675

Gautschi W: Barycentric formulae for cardinal (SINC-) interpolants by Jean-Paul Berrut (*Remark*) 791
Gerbeau J-F: A stabilized finite element method for the incompressible magnetohydrodynamic equations 83
Goeleven D → Adly S
Grün G, Rumpf M: Nonnegativity preserving convergent schemes for the thin film equation 113

Hager WW: Runge-Kutta methods in optimal control and the transformed adjoint system 247
Han W, Reddy BD: Convergence of approximations to the primal problem in plasticity under conditions of minimal regularity 283
Heuer N: An iterative substructuring method for the p-version of the boundary element method for hypersingular integral operators in three dimensions (*Erratum*) 793

Kellogg B, Liu B: The analysis of a finite element method for the Navier–Stokes equations with compressibility 153

Le Tallec P, Mani S: Numerical analysis of a linearised fluid-structure interaction problem 317
Linß T, Stynes M: The SDFEM on Shishkin meshes for linear convection-diffusion problems 457
Lin C-T, Tadmor E: L^1-Stability and error estimates for approximate Hamilton-Jacobi solutions 701
Liu B → Kellogg B

Maaß P, Pereverzev SV, Ramlau R, Solodky SG: An adaptive discretization for Tikhonov-Phillips regularization with a posteriori parameter selection 485
Mani S → Le Tallec P

Marthinsen A → Owren B
Maset S: Stability of Runge-Kutta methods for linear delay differential equations 355
Matejaš J: Quadratic convergence of scaled matrices in Jacobi method 171
Medjo TT: New formulations of a Stokes type problem related to the primitive equations of the atmosphere and applications 503

Nicaise S → Bourgeois C
Novo J, Titi ES, Wynne S: Efficient methods using high accuracy approximate inertial manifolds 523

Ohlberger M: A posteriori error estimate for finite volume approximations to singularly perturbed nonlinear convection-diffusion equations 737
Owren B, Marthinsen A: Integration methods based on canonical coordinates of the second kind 763
Oyanagi Y → Zhang SL

Pereverzev SV → Maaß P
Petrov PP → Bojanov BD
Plonka G, Ron A: A new factorization technique of the matrix mask of univariate refinable functions 555
Pugliese P → Eisinberg A

Qi H → Dontchev AL
Qi L → Dontchev AL

Ramlau R → Maaß P
Reddy BD → Han W
Rodríguez R → Bermúdez A
Ron A → Plonka G
Rumpf M → Grün G

Salerno N → Eisinberg A
Santamarina D → Bermúdez A
Solodky SG → Maaß P
Stynes M → Linß T
Sugihara M → Zhang SL

Tadmor E → Lin C-T
Thomée V, Wahlbin LB: Stability and analyticity in maximum-norm for simplicial Lagrange finite element semidiscretizations of parabolic equations with Dirichlet boundary conditions 373
Titi ES → Novo J

Wahlbin LB → Thomée V
Wynne S → Novo J

Zhang SL, Oyanagi Y, Sugihara M: Necessary and sufficient conditions for the convergence of Orthomin(k) on singular and inconsistent linear systems 391
